## CERTIFICATE

The pipe and conduit products manufactured by Beck Manufacturing, a division of Anvil International, L.P., are produced from approximately 25% - 85% recycled steel. The amount can vary, depending on the steel vendor.

Of the 25% - 85% recycled steel, approximately 30% is post-industrial and 70% is post-consumer, depending on fluctuating scrap prices.

The American Iron and Steel Institute (AISI) Web site states: "Steel's recycling rate of 66% is far higher than that of any other material, capturing twice as much tonnage as all other materials combined."

If I can be of any further assistance, please do not hesitate to contact me.

Sincerely,

John Ashbaugh  
Vice President & General Manager
